Subject: Canadian North Records and Engineering Documents

Dear Mr. Gaetano:

I know you have recently been in contact with our Director of Maintenance, Neal Liesemer. Neal is away on vacation now and I wanted to follow up on the progress that is (or is not) being made with respect to the tracking down our LLP records and the engineering documents relating to our aircraft. I wanted to advise you that I have been in contact in the past few days with some former Aveos employees who are very familiar with the records we are looking for and where they may be located. These individuals have indicated a willingness to be of assistance in finding these important documents.

In the interest of moving forward with this issue I would like to propose that Canadian North retain three individuals to help, one for engine LLP records, one for gear LLP records and one for the engineering documents. They could work under your direction to locate the items we are looking for.

If you are amenable to this suggestion please advise and I will begin the necessary arrangements in that regard.

I am best contacted on my cell or by email.

Regards,

Tracy Medve
President

Thank you Michael for getting back to me. We will discuss at this end but a call with all relevant parties would be good. We can then determine who we might need to get us across the finish line.

Tracy,

Thank you for your e-mail. We have been working with Neal and Kevin in Neal's absence. I'm not sure what was shared with you so far, but we have exchanged an update on the status of efforts.

In summary:

- 1) Of the 14 engine records, we confirm to have records associated with 7 ESNs and currently working on the remaining 6, for which 2 may actually be in YEG as they were recently sent to Dale's attention and 1 may date prior to our initial contract. 1 Engine was secured outside of the Aveos activities as confirmed by your team (ESN: 665850)
- 2) We've also located records pertaining to the 7 aircraft and other maintenance tags.
- 3) We're currently reviewing the records room in YVR to track down any of the remaining engine or other records and expect to have a status today.

As for engaging additional resources to support the effort, we have no issue with this at all.

«WITHOUT PREJUDICE»

Roger,

You will find attached the contact information (v-card) of Neal Liesemer, Director of maintenance at Canadian North. You can direct Mr. Gaetano to call Mr Liesemer in order to confirm what documents are needed from both sides and what is effectively available.

With respect to the SMART System, if Aveos is ready to carve out this issue from our set-off claim settlement discussions, Canadian North would be ready to pay for the unpaid months and ongoing access if Aveos is able to give back the access until the end of the year. Please let us know your position on this at your earliest convenience.

Regards,

Stéphane Hébert

Historique : Ce message a fait l'objet d'une réponse et a été transféré.

Stéphane,

To sort out what documents Aveos and Canadian North may have and need from each other, could Mike Gaetano of Aveos get in contact with his counterpart at Canadian North and we agree that they provide each other with the relevant information about what these documents are? It is understood no documents will be released until we have a judgment or agreement.

Please confirm.
