Heather,

Please find attached the Canadian North bid for the Aveos 737-200, 737-300 parts and tooling.

Canadian North's audited 2011 financial statements are attached, the password is aveos.

Please feel free to contact us if you have any questions.

Regards,

Steve

Aveos Parts bid:

The capitalized terms in this offer shall have the same meaning as that contained in Schedule G of the Recitals and Definitions contained in the Divestiture Process Introductory Letter dated April 20, 2012.

Canadian North submits the following bid:

A. Offer to Purchase

1. We offer to purchase the parts, tooling and vehicles on the list attached as Appendix "A" together with all parts located at an Aveos facility in Vancouver and Ottawa relating to 737-200 aircraft (the "Parts") in an "as-is, where-is" condition, free and clear of all liens and encumbrances, for the price of Seven Hundred Fifty Thousand Canadian Dollars (\$750,000 CDN);
2. We offer to:
  - (a) unconditionally release funds, currently held in trust with Miller Thompson, in the amount of One Million, One Hundred Nine Thousand Seven Hundred Forty-six Dollars and Nineteen Cents CDN (\$1,109,746.19 CDN) (the "Funds Held in Trust"); and
  - (b) to release all rights of setoff claimed in regard to the forgoing sum and provision by Canadian North of a release in a form acceptable to Aveos from any and all manner of action, causes of actions, suits, debts, sums of money, general damages, special damages, costs, disbursements, taxes, claims and demands of every nature and kind at law or in equity, upon occurrence of all of the following:
    - (i) Provision of a complete list of all records currently in the possession or control of Aveos related to all Life Limited Parts and Engineering Support Records ("Maintenance Records") as more fully described in the attached Appendix B relating to Canadian North;
    - (ii) Provision of and/or access to and release to Canadian North of all Maintenance Records in the possession of Aveos;
    - (iii) An undertaking from Aveos to provide complete cooperation with locating all Maintenance Records that are not in the possession or control of Aveos;
    - (iv) Confirmation of ongoing access and the granting of an independent licence and to the Systematic Maintenance And Record Technology ("Smart") maintenance program terminable by Canadian North;
    - (v) Provision by Aveos of a release in a form acceptable to Canadian North from any and all manner of action, causes of actions, suits, debts, sums of money, general damages, special damages, costs,

disbursements, taxes, claims and demands of every nature and kind at law or in equity,

B. Timing of Closing

1. Within forty-eight (48) hours of confirmation that our bid is the Accepted Bid or such other time as mutually agreed between Aveos and Canadian North.

C. Evidence of financing

1. We attach herewith our 2011 Audited Financial Statements and proof that the Funds Held in Trust is currently held in trust by Miller Thompson LLP and will be released on closing.

D. We acknowledge that we have had, and taken advantage of, the opportunity to conduct due diligence regarding the Parts.

E. We acknowledge and represent that we have:

1. relied solely upon our own independent review, investigation and inspection of any documents and the Aveos Business;
2. reviewed and accept in full the terms and conditions of the Divestiture Process, and
3. not relied on any written or oral statements, representations, promises, warranties or guaranties whatsoever, whether express or implied (by operation of law or otherwise), regarding the Aveos Business or the completeness of any information provided in connection the Divestiture Process.

F. We confirm that we have already provided full time employment to thirty (30) former Aveos maintenance engineers and an additional three (3) management personnel, independent of this bid.

G. Our principal advisors in this matter have been Terrence M. Warner and Stéphane Hébert of the firm Miller Thompson LLP.

H. We have submitted our deposit in the amount of One Hundred and Twelve Thousand Five Hundred Canadian Dollars (\$112,500 CDN) in trust to Fraser Milner Casgrain LLP

## APPENDIX "B"

### A. LLP Records

1. Life Limited Parts (LLP) are any parts for which a mandatory replacement limit is specified by the manufacturer and/or Transport Canada/Federal Aviation Authority. The life status of an LLP mean the accumulated cycles (= landings), hours or any other mandatory replacement limits of the LLP (can also be a calendar limit). An LLP is controlled using a record keeping system that substantiates the Part Number, Serial Number and current life status. Each time an LLP is removed from an aircraft the record must be updated with the current life status. Overhaul vendors must have the history back to birth for LLP authentication and life status tracking. Without the records the LLPs become worthless because there is no means of verifying their life status. Typically jet engine internal rotating parts, all landing gear piece parts that make a Nose or Main Landing gear assembly, and a few various airframe components are defined as Life Limited Part. As the operator of commercial transport category aircraft in Canada, Canadian North is responsible for ensuring that LLP's are tracked and removed/replaced as required. The regulations permit the Operator (Canadian North) to contract this responsibility to a third party, which we did in the context of the GTA with Aveos. The GTA, Annex B-2, section 4 "Records and Inspection" says Canadian north shall keep operation and maintenance records IAW TC requirements.
2. Annex B-3, para 2.1 a) viii states that Aveos will provide records for installed Components (including LLP's) including "serviceable" tags which includes Part Number, Serial Number, Total cycles/hours since new, back to birth history and total cycles/hours since last repair or overhaul.
3. Section 6.2 of the GTA states that Aveos is to retain the records for two years and then send them to Canadian North.

### B. Supporting Engineering Documents (Engineering Orders, Engineering Mandatory (for incorporation of Airworthiness Directive) Engineering Instructions)

1. Canadian North's B737-200 Maintenance program which Transport Canada approves as part of an air operator of transport category aircraft, has thousands of work tasks contained within the maintenance program. Hundreds of these

tasks have additional engineering requirements which were engineered by Canadian Airlines and Air Canada and are needed to maintain support of the current maintenance program. Without these documents the validity of the maintenance program is in jeopardy, and all the past engineering becomes unusable, which nullifies our maintenance program. Without a valid maintenance program our fleet would be grounded.
